Beaumont, California / (951) 867-6922 / payton.e.henry04@gmail.com / LinkedIn: www.linkedin.com/in/payton-e-henry

Education

Expected Graduation: June 2027 | California Baptist University, Riverside, CA

Bachelor's in Computer Science & concentration in Machine Learning and AI

Current Cumulative GPA 3.88

Experience

May 2025-Present | California Baptist University, Riverside, CA & NavalX TechBridge, Norco, CA

Salesforce Developer with CAiMLL

- Designing advanced Salesforce solutions using Apex, SOQL, Triggers, Flows, Lightning Web Components, and AI Agents through Agentforce to automate and enhance user workflows
 - Develop AI agents using natural language processing and machine learning to use unique data querying and accelerate the process of report writing
 - Build responsive Lightning Web Components using HTML, CSS, and JavaScript to create seamless user interfaces integrated within Salesforce
 - Collaborating with researchers and software engineers to brainstorm, create, and optimize our Salesforce and AI solutions through iterative development and testing
 - The project consists of rapid development, including version control with GitHub, Jira project management, and manifest-driven deployments across multiple Salesforce orgs using Salesforce CLI
 - Contributed to a 10-person engineering team creating high-importance deliverables with weekly sprints
-

Projects

Complete Stratocaster AutoCAD Model | October 2024 - December 2024

- Measured all parts and modeled, in AutoCAD, a Silvertone Stratocaster, in a team of two
- Accuracy of measurements of small components down to ± 0.001 inch

Bogey Busters Golf App | Partnered with Ryan Stoffel | September 2025 - Present

- Built a Flutter mobile app with Firebase backend handling user authentication, profile management, and real-time data sync across 40+ database documents.
 - Integrated OpenStreetMap's Overpass API to fetch golf course data including hole layouts, tee box coordinates, and green locations with automatic caching to reduce API calls.
 - Implemented Google Maps SDK with custom markers and polylines to track shot distances, calculate bearing angles, and display real-time GPS positioning during rounds
 - Developed a round persistence system using SharedPreferences that saves game state locally, allowing users to resume incomplete rounds after app restarts.
 - Created a social feed with friend requests, likes, and comments using Firestore real-time streams and Firebase Storage for profile pictures.
-

Volunteer and Leadership Experience

October 2023 | Bournes Technology Center, Riverside, CA

STEP Convention

- Showcased engineering projects and led youth who were interested in engineering to inspire them to pursue their interests.
-

Technical Skills and Developer Tools

C++, JAVA, Js, CSS, SQL, HTML, Python, IntelliJ, PyCharm, Clion, Salesforce, Vs Code, Autocad, Flutter/Dart
